A: Proteus main website seems to be down or force closed. However, their forum is still functional: The here linked download page does not contain the.lib (library) as promised. To get the library: Download the file'mycobacterium_proteus_library' to a location you know. Proteus is using a custom library (compared to X11 or other library) that you will not easily be able to extract. Compiling the library is to easy. LIBDIR=\$HOME/Documents/myc
